EXPLANATORY NOTES

This Bulletin contains particulars of weighted average minimum weekly wage rates for adult males for the period 1939 to 1959 and for adult females for the period 1951 to 1959, together with index numbers with base : year 1954 = 100. For adult males particulars are shown as at the end of each quarter from 31st March, 1939 to 31st December, 1956, and of each month from 31st January, 1957. Wage rates for adult females are compiled only as at the end of each quarter.

2. The figures herein have been published in part in the following Statistical Bulletins: - S.B. 754, which contained particulars for adult males for the period 31st December, 1939 to 30th June, 1959; S.B. 786 (adult males, 31st March, 1939 to 30th September, 1959 and adult females, 31st March, 1951 to 30th September, 1959); S.B. 902 (adult males, 31st December, 1939 to 30th November, 1960); and "Minimum Weekly Wage Rates - January, 1957 to June, 1961". This Bulletin consolidates and extends the information previously published and, for the periods covered, replaces the foregoing Statistical Bulletins.

3. The Minimum Wage Rate Index is based on the occupation structure existing in 1954. Weights for each industry and each occupation were derived from two sample surveys made in that year. The first was the Survey of Awards in April, 1954, which showed the number of employees covered by individual awards, determinations and agreements, and provided employee weights for each industry as well as a basis for the Survey of Award Occupations made in November, 1954. This second survey showed the number of employees in each occupation within selected awards, etc., in the various industries, thereby providing occupation weights.

4. The minimum wage rates used in the index are for representative occupations within each industry. They have been derived entirely from representative awards, determinations and agreements in force at the end of each period, commencing with 31st March, 1939, for adult males and 31st March, 1951, for adult females. The index for adult males includes rates for 3,406 award designations. However, as some of these designations are operative within more than one industry, or in more than one State, the total number of individual award occupations is 2,307. For adult females the corresponding numbers are 1,103 and 518. By use of the industry and occupation weights derived from the surveys described above, these rates were combined to give weighted averages for each industrial group for each State and Australia. Weighted averages of the components of the total minimum wage rate, i.e., basic wage, margin and loading, were calculated separately for adult male employees covered by Commonwealth awards, etc., and for those covered by State awards, etc.

5. Because the indexes are designed to measure movements in prescribed minimum rates of "wages" as distinct from "salaries", awards, etc., relating solely or mainly to salary earners are excluded.

6. In the tables herein, particulars for industrial groups have been shown only for Australia as a whole. Considerations of space preclude the publication of figures for each industrial group in each State, but these are available on request. The name of the former group "Public Administration and Professional" has been changed to "Public Authority (n.e.i.) and Community and Business Services", and the groups "Amusement, Sport and Recreation" and "Hotels, etc. and Personal Service", for which separate particulars were given in S.B. 786, are combined in this Bulletin as "Amusement, Hotels, Personal Service, etc.". The rural industry is not included in the index.

7. Definitions relevant to Commonwealth and State jurisdiction and to components of the total wage rate (shown in Tables 3 - 9) are as follows: -

"Commonwealth awards, etc." include awards of, or agreements registered with, the Commonwealth Conciliation and Arbitration Commission, and determinations of the Commonwealth Public Service Arbitrator.

"State awards, etc." include awards or determinations of, or agreements registered with, State industrial tribunals, together with certain unregistered agreements, where these are dominant in the particular industries to which they refer.

"Basic wage" rates are weighted averages of the rates prescribed in awards, etc., for the occupations included in the index for each State. For industries other than mining, metropolitan basic wage rates have generally been used. However,

there are a number of occupations for which basic wage rates other than the metropolitan rate are prescribed. Also, in some States at various times, State Government employees under Commonwealth awards have been paid State basic wage rates, and the basic wage rates of some employees have been subject to automatic quarterly adjustments while those of other employees within the same jurisdiction have remained unchanged. In all such cases the basic wage rate actually paid is used in tables herein. For these and other reasons, the weighted average basic wage rates shown in the tables in this Bulletin differ, in the majority of cases, from the metropolitan basic wage rates shown in other Bureau publications.

"Margins" are minimum amounts, in addition to the basic wage, awarded to particular classifications of employees for features attaching to their work, such as skill, experience, arduousness or other like factors.

"Loadings" include industry loadings and other general loadings prescribed in awards, etc. for the occupations included in the index.

8. The proportion of employees covered by Commonwealth and State awards, etc., varies considerably as between States. In addition, the proportions of employees engaged in the respective industries differ from State to State. As a result there are relatively wide differences between the weighted average amounts of margins and loadings in the several States.

9. In ascertaining from awards, etc., the wage rates for representative occupations, it was found in some cases that an occupation selected as representative in the base year (1954) did not exist in earlier years. In such cases another occupation with the same marginal rate of wage was chosen from the same award and variations in the wage rates for this occupation were taken to be representative for the earlier period.

10. Since 1954 the industrial structure in Australia, and particularly in some States, has been undergoing a degree of change which over a period is likely to have some effects on the index. Generally the effect of new or expanding industries on the index is not significant, because occupations in such industries can usually be covered by existing awards, and the wage rates for the new occupations conform very closely to those for existing occupations. Occasionally, however, an entirely new award is made to cover a new industry, and in such cases occupations from the new award are introduced into the index whenever such action is warranted by the number of employees in the industry. By these means it has been possible for the occupations in the index to be kept, as nearly as may be, continuously representative and for a high degree of comparability to be preserved over a long period.

11. In many cases when awards, etc. are varied, the new wage rates are made retrospective, and in such cases the index is revised to incorporate the new rates as from the dates from which they became operative. Also, there is generally an unavoidable, and sometimes considerable, delay in the receipt of notification of changes in margins and loadings in respect of the occupations included in the index. For these reasons, current rates and index numbers are always subject to some degree of revision. This Bulletin therefore contains particulars only to the end of December, 1959. For wage rates and index numbers for the period January, 1960 to June, 1962, reference should be made to Statistical Bulletin No. 124, October, 1962. Current figures are published in the Monthly Bulletin of Employment Statistics.
